

1 Categories of Data Models

- Conceptual data model
- Implementation data model
- Physical data model

2 Three Schema Architecture

Internal Schema Physical data model.

- Physical storage structure
- Data storage details, access path

Conceptual Schema Conceptual or implementation data model.

- Structure of the entire database
- Entities, data types, relationships

External Schema Describe the various user views.

- Usually uses the same data model as the conceptual schema.

3 Data Independence

3.1 Logical Data Independence

The capacity to change the conceptual schema without having to change the external schemas and their associated application programs.

3.2 Physical Data Independence

The capacity to change the internal schema without having to change the conceptual schema.
